engagedlearning

Environmental Planning 2: Regional Landscapes and Ecological Systems

The role of planning and public policy in the protection of regional landscapes and ecological systems

Land use and the shift to sustainable land planning

Implications of alternative energy systems, watershed management, wetland protection, and habitat preservation

GREEN SUBDIVISION?

Guest speakers include planners and agency professionals working on real problems. Students will apply concepts from earth sciences and ecosystem biology to planning and policy

**ENV 653/753, UST 653/753, PDD 653
6:00-9:50 p.m. Wednesdays**

Dr. Wendy Kellogg is a member of the Ohio Planning Conference, and provides research and professional service to the Ohio Balanced Growth Program, EcoVillage Cleveland, GreenCityBlueLake Institute, and other organizations
