

# FTP Using WS\_FTP

First, begin a new session. Connect to urban.csuohio.edu using your **URBAN** login and password.

Once connected, the screen below appears. To move files from the current location to your home directory, simply navigate to the file on your local system (left), select with mouse and use the arrows in the center of the two windows to move the file to the appropriate area on your h drive. You can also move files from your h drive to the local system (another lab on campus, home, etc.)
