

GRADUATION RATES

Although Cleveland State tracks 6-year graduation rates and 2nd year retention rates, these metrics are not useful to CSU licensure programs since our candidates are accepted into undergraduate licensure programs after they complete introductory education classes in their sophomore or junior year. Many licensure candidates also come into the college as transfer students from local community colleges. For this reason, Cleveland State has undertaken an analysis of graduation rates by cohorts of candidates enrolled in introductory education classes.

Licensure programs in all areas are sequenced across 5 clinical experiences. Candidates in early childhood, middle childhood, and special education enroll in the CREATE program, which is sequenced across five semesters—3 rotations and 2 internships. Candidates for adolescent/young adult (AYA) licenses and modern languages begin with Step 1 and 2 courses, continue with Classroom Interactions, and finish with Apprentice Teaching 1 and 2.

The data tables and graphs show the progression through the program for licensure students beginning with the 2016 cohorts. One graph analyzes CREATE enrollment overall and broken down by licensure area. The other page analyzes CSUTeach enrollment overall and broken down into Humanities (English, Social Studies, and Modern Languages) and STEM (mathematics and science). Both tables also include an overall analysis of the CREATE and CSUTeach programs respectively.

Typically, candidates take 5 semesters to finish a program from the time they take their introductory course, so by Spring 2022, CREATE candidates starting Spring 2020 and before and CSUTeach candidates starting in 19-20 and before would be complete if they follow the planned program of study without stopping out. Retention for those cohorts in the CREATE program, by licensure, ranged from 48% to 73% and for the CSUTeach program from 14% to 44%. These completion rates are somewhat skewed because a fairly large number of candidates do not continue beyond the introductory clinical experience for a variety of reasons, including academic issues and conscious decisions that teaching is not a good career fit. Once candidates are accepted into a licensure program, we see higher graduation rates reflected in the licensure-specific tables. For the CREATE programs, retention of accepted candidates who began in Spring 2020 ranged from 54% to 80%. There is no comparable decision-making point for CSUTeach candidates, but the retention of CSUTeach candidates overall is lower.

In addition, we have learned from this analysis that some candidates merely take longer than the projected time to finish because they complete additional course work off cycle. Faculty are now undertaking a detailed analysis of candidates who left the program or fell off-cycle to determine whether there might be advising interventions, course sequencing/scheduling, or other strategies to increase retention and to help candidates finish programs in a timely fashion.

The following data tables and charts are included below:

- CREATE Enrollment Trends (Spring 16, Spring 17, Spring 18, Spring 19, Spring 20, and Spring 21 cohorts)
- CSUTeach Enrollment Trends (16-17, 17-18, 18-19, 19-20, 20-21, and 21-22 cohorts)

CREATE Programs Enrollment Trends – April 2022

ECE	Rot 1	Rot 2	Rot 3	Int 1	Int 2	Retention % Across Program
